

Equipment Autorisation Division Federal Communications Commission 7435 Oakland Mills Road Columbia, MD 21046

FCC ID: YGN-RFKTBX001

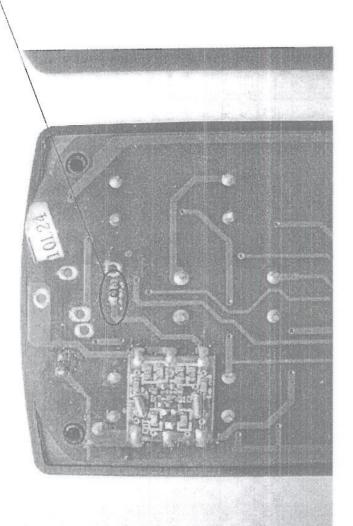

Product Name: RF Controller (Model: GS, GS-W)

Request for Class II permissive change

Attached is a drawing of indicating the change made to this equipment.

Greg Neff - General Manager

Dug/W/-

J. Hardware:

power, then the frequency can meet the requirements of FCC (the test result is in following report.), but the range of transmitter is shorter. Have added 1 pc 15K current-limiting resistance to the signal input of the transmitter module to reduce the transmitting

2.Software:

Nothing changed.

3.Tuning:

Main frequency haven't been changed, still is 433HZ.

4.PCB layout:

Noting changed.

5.Power setting: Noting changed.
